Summary
Product leader with 10+ years building and scaling consumer products, recommendation systems, and LLM-powered experiences. Led 0-to-1 products from concept through production, shipped AI experiences that improved retention and engagement, and contributed directly to production code alongside engineering teams.

EXPERIENCE

Yahoo! | San Francisco
Principal Product Manager, AI — Dec 2024 – Present

- Led 0-to-1 product development and launch of **AlphaSpace**, Yahoo Finance's flagship investment platform, partnering across product, engineering, and design from concept through production.
- Contributed production code to AlphaSpace, shipping user-facing features alongside engineering using AI-assisted development tools and coding agents.
- Built LLM-powered experiences across financial news and portfolio workflows, including contextual article Q&A that **increased time spent by 12%**.
- Defined system prompts, evaluation frameworks, and guardrails for production LLM experiences to improve response quality and reliability.

SmartNews | San Francisco
Senior Product Manager, Mobile Apps & RecSys — June 2022 – Nov 2024

- Launched a generative AI-powered ranking system that improved article relevance and **increased Day 7 retention by 7%**.
- Overhauled the push notification system, driving an **8% increase in revenue**.
- Productized LLM-based content scoring to improve ranking and personalization across the news experience.

Medium | San Francisco
Product Manager, Mobile Apps — July 2019 – March 2022

- Led the end-to-end redesign of Medium's iOS and Android apps, from product strategy through launch.
- Launched a new commenting experience that **increased comments by 12%** and improved engagement.

Evie Labs (acquired by Medium) | Palo Alto
Product Manager — November 2016 – July 2019

- Led product for Evie, the **#1-rated Android launcher**, scaling daily active users from **30K to 400K**.

DirecTV | Los Angeles
Senior QA Engineer — June 2013 – October 2016

- Led QA strategy for NFL Sunday Ticket and March Madness, **reducing regression by 40% through automation**.

Side Projects

- Meelni.com: Built AI voice agents that conduct realistic product management mock interviews and deliver real-time feedback.
- Beacon: Observability platform enabling teams to inspect, evaluate, and debug autonomous AI agents.
